WORK EXPERIENCE

Angular Developer
GIF Technologies Pvt. Ltd.

03/2022 - Present   *Nagpur*

GIF Technologies is a global provider of enterprise solutions to a leading global smart schooling system with having 17+ branches in different countries.

- Developing responsive and **scalable web applications** using Angular framework.
- Creating **reusable components,** services, and directives to improve application performance.
- Ability to work with AJAX libraries and frameworks such as **jQuery** and **AngularJS**.
- **Debugging** and troubleshooting production issues and **providing effective solutions**.
- Performing **unit testing** to ensure application functionality and code quality.

PROJECTS (MODULES)

• Messaging Mail Module - Angular
Purpose:

- An responsive messaging mail module that allows users to easily manage their inbox. In this module, users can view a comprehensive list of all their emails in their inbox. Additionally, **users have the ability to read, reply to, and forward specific emails** .
- Users can quickly and **easily search for specific emails by subject and can navigate through their inbox using pagination** and by **using multi-select checkbox feature** that enables users to **select multiple emails** at once and delete them by clicking on the **delete icon** .
- If a user has sent an email, they can **easily visit their sent mailbox** to view their previous correspondence. This makes it easy for users to keep track of their communication history and stay organized.

• Feature Access User (**CRUD operation**) - **Angular**
Purpose:

- An user interface has a list of users with pagination and search options with a dropdown menu and an input field to enable users to **search for specific users**.
- On the listing page, there will be **two action icons** displayed for each user - an update icon and a delete icon. These icons will allow users to **update** and **delete** user data as needed.
- When users click the "Add User" button, a similar update component will appear, but with **different functionality** . This component will allow users to **create** new users to the list.
- Once users have edited or added a user, they can submit the changes by clicking on the corresponding submit button. After submitting, users will be **redirect** back to the list page, where they can **view** the updated user data.

• Dynamic Master Field with DataTables Plugin - AngularJS
Purpose:

- The master interface is designed to make **working with data stored in a database easier and more efficient**. The interface makes use of the **DataTables (JQuery) plugin**, which allows for the creation of a dynamic table interface. In addition, there is a search drop-down menu that enables users to select a **specific campus** of data to display in the table.
- When users click on a user's name in the table, all the input fields will be display in **View page interface**. These input fields are generated **dynamically based on the tag names provided by the backend developer**. If the input fields are already filled with information, the values will be displayed within the fields. However, if the field is blank, users can enter the necessary information.

SKILLS

Angular	AngularJS	TypeScript
JavaScript	Ajax	Restful API
Debugging	JQuery	Bootstrap
CSS3	HTML5	TFS	GitHub
Adobe Photoshop
